Adam Risberg

Full-stack Web Developer, currently specializing in React and Node based web apps with a background in windows software development. A hard worker who is always excited to learn and face new challenges.

WORK HISTORY

- **Freelance Web Development, 2016-Present**
  Full-stack development, specializing in React and Node based websites.

- **Freelance Programmer & Computer Technician, 2011-2018**
  Custom programming (Windows software), static websites, computer repair, and technical support.

WEB PROJECTS

- **Only Music Folders Online Store**
  www.onlymusicfolders.com

  Installed, configured, and customized OpenCart. Wrote extensions and tweaked source code to handle product option requirements, fit their workflow, and allow integration with the company's business software. (OpenCart, PHP, MYSQL)

- **Deer River Folio Website**
  www.deerriverfolio.com

  Redesign of an old site to make it mobile friendly with improved look, user experience, and maintainability. (React & Static Rendering)

- **React Express Cart**
  www.cart.adamrisberg.com

  An open source React and Express based shopping cart system. Similar to Magento, OpenCart, etc. (React, Express, MongoDB)

- **React Image Magnifiers**
  adamrisberg.github.io/react-image-magnifiers

  An open source collection of responsive, image magnifying React components with mouse and touch interactions. (React)

- **React Input Position**
  adamrisberg.github.io/react-input-position

  An open source React component that decorates it's children with mouse/touch position tracking and a status toggle fired by click/gesture events. (React)

WINDOWS PROJECTS

- **Deer River Folio Business Software**
  Business software including accounting, payroll, orders, inventory, etc. Worked closely with the company to automate everything possible and tailor the software to their desired workflow. (C#, WPF, MYSQL)

- **Deer River Folio Time Clock Software**
  Windows software allowing employees to clock in/out and request vacation days. (C#, WPF, MYSQL)
